Upright Labs

New Store Setup Guide

New Store? Lost your store's password?

Use this guide to request access to new stores or learn how to reset your password.

New Account Setup

To set up a new Upright Labs account:

Email eservices@goodwillaz.org to request a store account be set up in Upright Labs.

The logo for Upright Labs, featuring the word "upright" in a lowercase, serif font. A small blue triangle is positioned above the letter 'i'.

Note:

- E-Commerce leadership will set up your account and let you know when it is active.
- Follow the steps on the next page once your account is set up to set your password.

Password Initial Setup/Change

Follow the steps below to set up your unique store password or reset your password.

1. Navigate to the Upright Labs website: <https://app.uprightlabs.com>
2. Click on the “Forgot your password or username?” link.
3. Enter your username/store email address and click the “Send password reset email” button.
4. Navigate to the email inbox for the email you entered in Step 3.
5. Click the “Reset Password” button in the email. You’ll be taken to the Reset Password page.
6. Enter the password you would like to use for your store and confirm the password.
7. Click the “Update password” button, and your password should be successfully updated.

Note:

If you have a terminated team member who had access to your general store login, you will need to follow the Password Change steps on the previous page to change your password.

*If you cannot log in or did not receive the password reset email,
send an email to: eservices@goodwillaz.org with your **store number** and **phone number**.*

Logging Into Upright Labs

Follow the steps below to log in to Upright Labs.

1. Navigate to the Upright Labs website:
<https://app.uprightlabs.com>
2. Enter your username* or store email address (i.e.,
Store039 or Store039@goodwillaz.org)
3. Enter your password and click on the Sign In button.

*Your User Name can also be found in the password reset email you received in the previous step.

Note:

Upright Labs can be accessed from within or outside of your Goodwill network.

Welcome back!

Sending Items to E-Commerce

1. Manifests are created for each tote and gaylords containing loose items.
2. The Manifest Barcode is always unique to the tote or gaylord you are sending. Totes will use the serial number located on the serial number tag as the Manifest barcode. Gaylord can use the system-generated barcode.
3. A copy of the Manifest should be placed **INSIDE** the tote it was created for. Gaylords should have a copy of the manifest taped to the outside of the gaylord.
4. Jewelry, Collectibles, and Electronics should be separated.
 - a. Jewelry totes should only include bags of jewelry. Be sure these are light enough for one person to lift. (This is normally about 4 bags of jewelry). All jewelry should be in bags, not loose in the tote.
 - b. Electronics totes should include any item(s) that plug-in or utilize a battery (stereos, tablets, phones, computers, etc.)
 - c. If the tote contains anything else, it is a 'Collectibles tote'.
5. All totes should be sealed at one end with the Serial Number tag and the other end with a regular zip-tie.
6. You will need to **send an email** to transportation@goodwillaz.org when you have e-Commerce items ready for pickup. The system will NOT notify transportation.

Manifest Screen

1. Login to the Upright Labs website: <https://app.uprightlabs.com>
2. Click the **Add manifest** button in the top righthand corner
3. This screen also shows you all manifests that have been created for your store and the status of each item.

Products 0

Title

Supplier Notes

The Manifest barcode should be REPLACED with the SERIAL NUMBER located on the orange serial number tag that is attached to the tote. Leave the auto-populated barcode if sending in large items or a gaylord that do not have a serial number attached.

Title can be as detailed as you want, or simply say 'Collectibles', 'Electronics', or 'Jewelry' but should be representative of what is in the tote/gaylord. See examples on next page.

Supplier Notes can be seen by the processors in E-Commerce. You can relay any specific information about this manifest here. Example: "Although the Super Man in this tote is damaged, we think it's worth a lot of money!"

Option 1: Simple Manifesting

The screenshot shows a software interface for manifesting. At the top, there is a search bar with the text "Search for another manifest...". Below this, the manifest number "56399" is displayed in a large font, followed by the status "Created". An orange arrow points from a callout box to the number "56399". Below the number, it says "Created on Jan 26, 2022 by Store039" and "Sent by 039".

Under the "Products" section, there is a list of items. The first item is "Collectibles" with a checkbox to its left. A blue arrow points from a callout box to the word "Collectibles". Below "Collectibles", it says "Not processed • 56399-A".

At the bottom, there is a "Supplier notes" section. A callout box points to a note that reads: "Although the Super Man in this tote is damaged, we think it's worth a lot of money!".

On the right side of the interface, there are three buttons: "Edit", "Print sheet", and "Print barcode". A black arrow points from a callout box to the "Print sheet" button. The callout box contains the text: "When finished, click Print sheet, and print two copies. One goes in the tote and the other is be given to the driver."

There is also a "Sort by status" toggle switch on the right side.

Editing a Manifest

Need to add more items, remove an item, or change a line item? Just Click 'Edit'.

Manifests > View Manifest > Edit Manifest

Click SAVE Manifest after creating or editing a manifest!

Supplier Notes

Store039 commented on 01/26/2022

If you decided not to send the item, delete it. If you forgot to put it in the tote, delete it. THIS IS VERY IMPORTANT as we will need to investigate why it was shown and not received.

Send an email to transportation@goodwillaz.org when you have e-Commerce items ready for pickup. The drivers will only take e-Commerce if given the corresponding manifests they are picking up.

Printed Manifest

This is the result of the printed manifest and will be used by e-Commerce to process the items and ensure your store is credited.

#	Description	Product Barcode
1	Spider Man Figure	 56399-A

5. Click Update Status and then select Ready for Pickup.

Update status Print sheet Print barcode More ▾

Sort by status

Print Scan Form for Driver

1. From the main Manifest Home Screen, click the drop down & select Ready for Pickup

2. Select All Manifests. Use the TOP checkbox to auto-select all manifests after you have filtered only the ones Ready for Pickup.

								2 results	
2 items selected		Change status		Print Scan Form					
[Search]		[Select]		[Select]		Ready for Pickup			
<input checked="" type="checkbox"/>	099VPEVPE	5	099	ROC Clearance Store	07/27 5:39pm	07/27 5:42pm	Ready for Pickup		
<input checked="" type="checkbox"/>	0084427-test	4	099	Kristy Shaver	07/27 5:15pm	07/27 5:36pm	Ready for Pickup		

3. Print Scan Form which will be handed to the driver for verification of totes/gaylords they will pickup.

NOTE: Until further notice, you will still need to email transportation@goodwillaz.org and inform them when you have items ready for pickup. Be sure to update the Status to 'Ready for Pickup,' which will be used in the next step. When the status is updated, it will appear next to the manifest number in the top left, as shown

Common Manifesting Issues

Avoiding these common manifesting errors will help ensure that your store receives credit for items sent to e-Commerce.

Totes in Gaylord:

- No Serial Number
- No Tracking Number
- All on a single manifest

Incorrectly Manifested

The above Gaylord to the right was received with no manifest. The sending store put a sign with a store number instead of a manifest.

The tote to the left was received separately and had a manifest indicating it was a Gaylord.

A full can of oil was loose in a tote of misc. Saved as much as possible, but all items required cleaning.

Example of Gaylord Received

Gaylord contained loose small and large items, totes, and trash.
No manifest was received.

Mixed Product in Totes/Jewelry Bags

Contains collectibles & electronics

Contains jewelry, collectibles, and electronics

Contains loose jewelry

Over-filled with jewelry

Non-jewelry items in jewelry bags

Jewelry Sorting Station

E-Commerce often finds lighters, coins, small collectibles, & knives in jewelry bags. Processor stations have boxes to put those items into; however, the sending store may not be credited. Once these items are processed, they are assigned to a random store for credit.
